

MAINTENANCE RECORD APPENDIX FOR AD 2011-12-10

Applicable to Model R22, R22 Alpha, R22 Beta, and R22 Mariner helicopters with P/N A016-4 main rotor blades; Model R44 helicopters with P/N C016-2 main rotor blades; Model R44 II helicopters with P/N C016-5 main rotor blades.

MODEL	REGISTRATION NO.	HELICOPTER SERIAL NO.	MAIN ROTOR BLADE PART NO.
-------	------------------	-----------------------	---------------------------

Per AD 2011-12-10, Amendment 39-16717 effective 5 July 2011, paragraph (a), I have visually checked for any exposed (bare metal) skin-to-spar joint area on the lower surface of each main rotor blade. (This check must be performed prior to the first flight of each day and may be performed by the owner/operator (pilot) holding at least a private pilot certificate. Any exposed skin-to-spar joint area must be refinished before further flight.)

[illegible]
